WIKKI STIX - THE COOLEST CRAFT TOY IN TOWN!

Having some extra time meaning we can have some fun doing crafts at home with my girls. Most of the time, the girls will ask to do painting. Knowing this might create lots of mess and after cleanup work, I have to reject their idea. Therefore, I have send them to Meryn's studio..hehhehe**lazy mom** Sometimes, I just wish there is a craft toy which is absolutely mess free! Glad that my wish is granted. Thanks to Adeline who introduce me and my kids to **WIKKI STIX**.

1) What is WIKKI STIX?

Wikki Stix is a type of creativity toy made of hand-knitting yarn enhanced with a microcrystalline food-grade, non-toxic wax, the kind used in bubble gum and lipstick. They do not contain latex, gluten, nor peanut or other nut oils or byproducts which makes them an ideal creative activity toy for children with allergies. WIKKI STIX is 100% made in the USA *

2) And how do they work?

****Simply stated...they stick! No glue, no paste, no mess. Just press them down with light fingertip pressure and they will adhere to almost any smooth surface. They are also easy to peel up and reposition so "mistakes" virtually disappear, which helps build self-confidence. There is no preparation, no clean-up, no mess. Press 'em down, peel 'em off... it's that simple!****

NO clean up and No Mess...That's what a type of educational and fun craft toy I am looking for.

You can twist..roll..a knot or how you want it to be. You can easily turn it back to a normal stix without heaving breaking it or tear part unless you are going to cut it with a scissor.

Big E love to experience with new toy what's more it can help to stimulate her imagination & creativity by coming out with impressive masterpiece of her own. She already determines to create a 3D masterpiece and pestering me to get more stix for her. In fact I also get obsessed with this creativity toy. Each time, I was eager to create something out of it and let the kids to guess what I have created. **WIKKI STIX definitely serves as one of the best educational toys for your children.**

I guess being a parent will surely concern about the safety of the toy. Is it safe for the kids to play?

****Wikki Stix has been certified to conform to the safety standards set by the Commission, the ASTM D-4236 which is the art material safety standard used in schools, the F-963, as well as the European Standard BS5665/EN71.**

In addition to assuring you that there is nothing toxic nor lead-bearing in our product, we would also like to advise those of you dealing with allergy situations, that Wikki Stix do not contain latex, gluten, nor any peanut or other nut oils or byproducts. Wikki Stix are made of acrylic hand-knitting yarn (the kind you'd use to knit baby booties!) and a food-grade, microcrystalline wax, derived from the petroleum refining process. This wax is also used in lipsticks, bubble gum and as a covering for certain cheeses.

*In short, Wikki Stix is safe, gluten-free and non-toxic. ** sourced from [WIKKISTIX ASIA](#)*

I can't wait to order more as it serves an entertaining toy when we are traveling in a car or a plane. I think it will also keep the girls occupy while we are waiting for food to serve in a restaurant instead they getting the cutlery as the toy which I got so annoyed all the time.

And now you might want to know where you can buy it....WIKKI STIX is available at these stores in Malaysia.
