The spelling may not be dictionary perfect but, the description is. Mix a piece of yarn with a touch of non-toxic patented wax, and you get Wikki Stix, an award winning product that is 100% made in the USA.

What is Wikki Stix?

You know about 3M and Post-It Notes? Keep that thought in mind and imagine a 6" to 8" piece of yarn, manufactured in the USA in 27 colours, and you've got Wikki Stix! Your child can stick it, twist it, bend it, mould it, roll it, over and over, again and again. Wikki Stix is an open-ended "toy", with endless ways to play with and create!

What's more, it can also be used as a teaching tool. Teachers and parents can use Wikki Stix to teach children how to spell, read, learn shapes, and even learn Math! Because it is flexible, Wikki Stix also helps to develop your child's fine motor skills, specifically in hand and finger dexterity. Unlike crayons and other art materials, Wikki Stix is mess-free, clean and reusable. If any residue occurs, all you need is a quick wipe with a paper towel or dry cloth, and it's gone!

Non-toxic, gluten free, and food colouring safe, it's suitable for children with allergies. Wikki Stix has been certified to conform to the U.S. consumer product safety standards set by the Commission, which is the art material safety standard used in schools, as well as the European Standard.

Whether you're a teacher working with children or just a frustrated parent looking to keep your kid seated through dinner, if you're looking to bring some novelty into everyday learning for kids, Wikki Stix might just be the answer.
