Wikki Stix : One of a kind creatables!

When I first received an email to review about this product, I must admit I have never heard of it before nor see it anywhere. From the brochure received, it looks pretty much like play-doh or any other clays. So what make it so different?

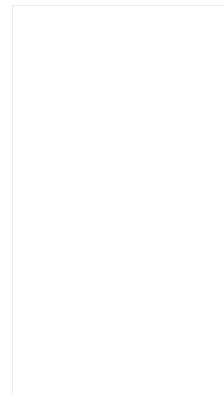

Wikki Stix is a an award winning wax yarn made in USA. It is safe to play for children as it is made of non-toxic and allergy free material. Wikki Stix has just made their first launched in Asia recently. Being a parent and having kids, I always look for safe, non-toxic product and of course, minimal mess!

Hariz was the one who was so excited when I first show him Wikki Stix. He took his chair, sat on it and ready to explore! Boy I've never seen him this enthusiastic!

He started off with the connect-the-dots game where he has to connect all the dots to form a shape. You can say he was trying so hard to make the shape!

Can you guess what is it? No? Not yet? ok hang on.

Wikki stix is so flexible. You can shape it any way you like it. You can even bend it and it will stay in good shape. The best thing I like about Wikki Stix, is it stick on paper or any other surface but no on hands! Although it is sticky, it never leave any residue! It's every mom's dream! They can roll in on the floor, step on it ah you name it!

There was an error in this gadget

But of course, Sara would like to get into the picture too. She's only 1 but she knows how to play. I too don't have to be worried because she like to put everything inside her mouth as this is non-toxic and safe!

You can tell Hariz is having so much fun creating stuff. I made him this glasses and he won't take it off!
The next Harry Porters perhaps?

Well that's the end product of his creations. It doesn't look like snow man at all but at least he made it himself!
:Wikki Stix stick on paper and any other surface. You can peel it off and stick them as many time as you like!
There's no glue needed!

There are so many more interesting things you can do with Wikki Stix.

{taken from Wikki Stix's blog}

To conclude this little amazing product we had, I must say we can't get enough of 1 pack! We will get more so Hariz can play at his own creativity.

Almost there!

{moms, don't let your kids do this at home!}
